

What is the **CRC** ?

- ❑ A workshop of 1500 m², including a pressurized and air-conditioned area of 1100 m²,
- ❑ One 5 tons traveling crane and 12 jib cranes from 500 kg to 3 tons,
- ❑ One hydraulic cylinder repair stand,
- ❑ One engine dynamometer 2100 HP equipped with an electronic data acquisition system,
- ❑ One magnetic particles test bench for crack detection (Magna-Flux type),
- ❑ One vibratory parts cleaner,
- ❑ One generator test bench,
- ❑ Specific tools and diagnostic tools,
- ❑ 20 technicians / mechanics / electricians,
- ❑ Many major components available : engines, transmissions, torque converters, final drives,....

The **CRC** respects contamination control rules :

Pressurized workshop, spare parts storage in clean condition, rebuilt components wrapped in protecting film,...

PEX COMPONENT EXCHANGE

The solution for major overhauls

The **PEX** program is based on an exchange process :

When a component is ordered, the same worn part, named « core », has to be returned to the CRC. The « core » acceptance criteria are the same as for CATERPILLAR REMAN.

**Quality is as good as for a new part
A 6 months warranty**

REBUILT STANDARD REPAIR

A new life for your components

The **Rebuilt** is a standard repair of your component, in accordance with CATERPILLAR standard repair processes.

Repairs follow your equipment requirements and are performed with modern and specialized tools and advanced test advices.

**Reduced time of reconditioning.
A 6 months warranty**

Attractive prices.

Labor invoicing (for diagnosis, repair and tests) is based on fixed prices.

Spare parts invoicing is based on specific quotes, established in accordance with CATERPILLAR guideline for reusable parts.
